

GPS Works in WGS84 & ECEF

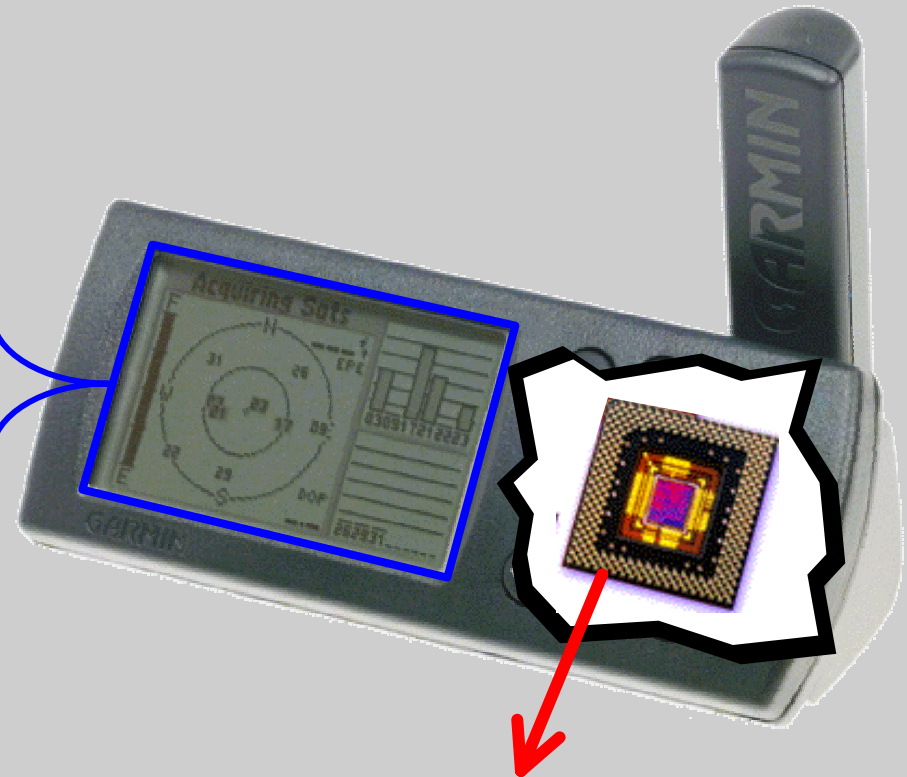

Datum Displays

Coordinate System Displays

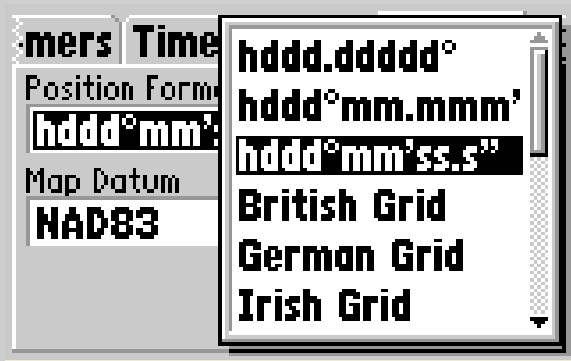

The user can only change the way coordinates are displayed by setting datum and coordinate system.

The receiver's processor always works in datum WGS84 and coordinate system ECEF.

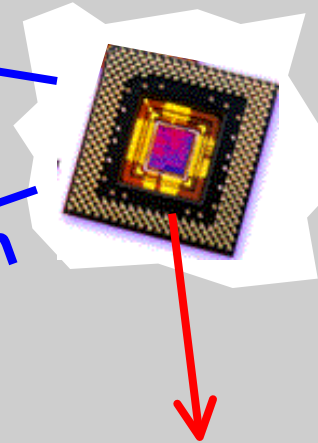

GPS Uses WGS84 & ECEF

User selects the datum and coordinate system for display only.

Coordinate System

Datum

Receiver's processor always performs calculations in WGS84 and Earth Centered Earth Fixed (ECEF).
